Flooring is the foundation of any space. It both makes a statement and can guide the rest of one's aesthetic. No wonder so many homeowners pursue updating the floors as their most impactful renovation investment. Enter, Creative Floors. The Edwards, Colorado, showroom and design studio invites locals to shop an unparalleled selection—chosen by experts and chosen for your home with their insights at hand. "We go through thousands of sample options and narrow them down to only the best," owner Shannon Ellicker says. "Shopping for flooring can be overwhelming and it isn't something you do very often. When you do, you need a professional who can make the right recommendations and keep the process fun, affordable and easy." A pro is key, too, when it comes time for install. Creative Floors employs craftspeople Ellicker calls "passionate perfectionists," and when working with something as exact as flooring, who could be better?

Top This space features 8-inch wide-plank oak flooring in the Tuscan style. **Left** The staircase features white planks with a black metal railing. **Center** This gorgeous wood-and-silk stair runner is custom-crafted in the studio. **Right** The kitchen features 8-inch wide-plank rustic oak flooring is perfect in this kitchen.

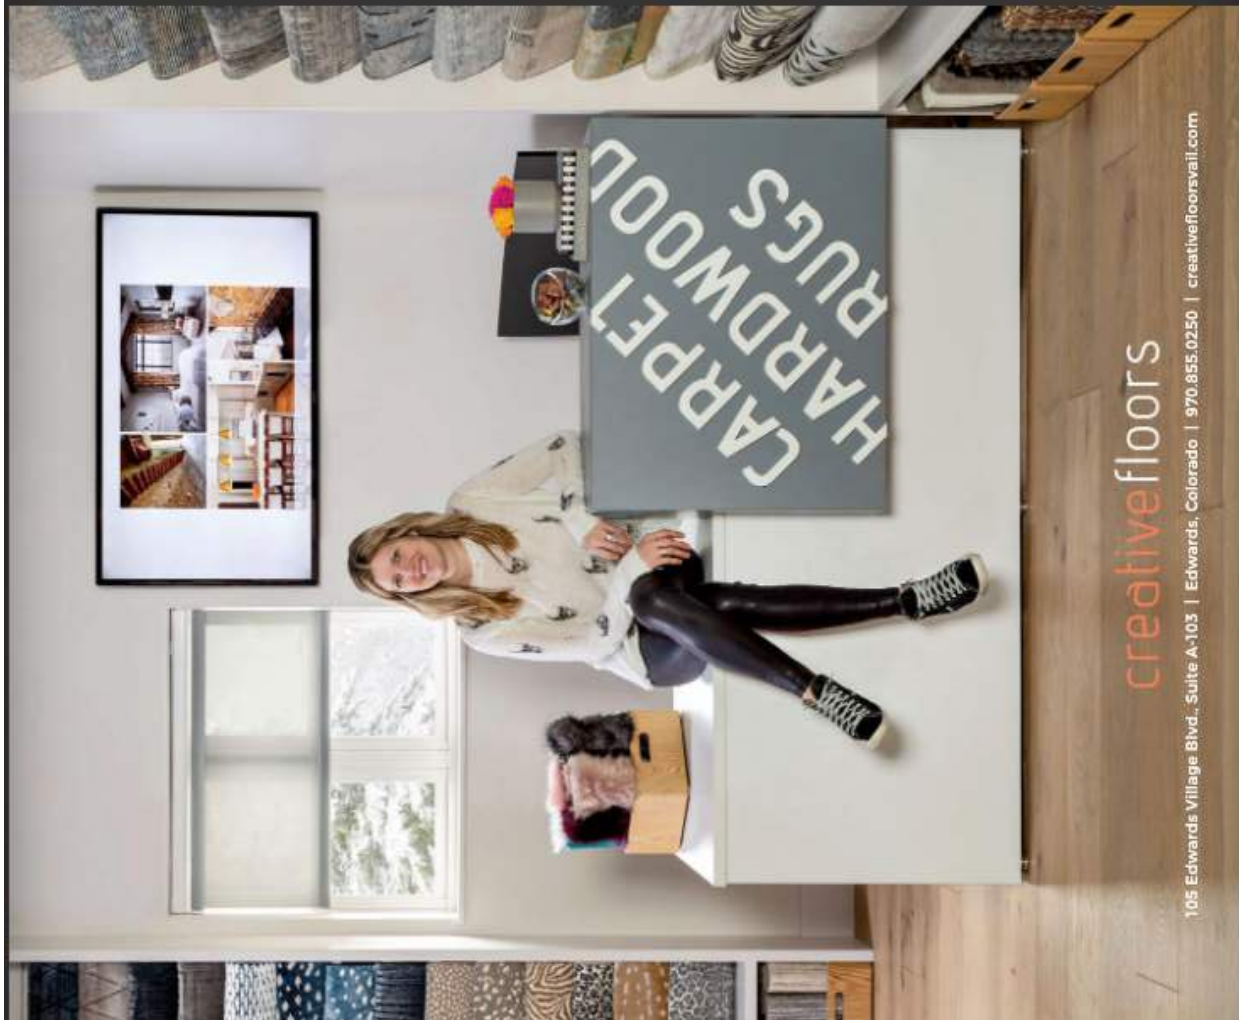

"You can truly change your whole home with new flooring."

FROM OVERHAUL TO ONE-DAY UPDATE

Whether you want to fully gut your spaces or crave a quick and simple pick-me-up, flooring can accommodate.

• **Major changes:** Flipping out the flooring in a room—especially a sprawling open-concept living space—can completely evolve the feel of it. Another idea Ellicker deems popular is barn board around a bar, on a bedroom wall or as a fireplace wrap.

• **Minute but influential:** "We are known for our one-of-a-kind area rugs, sourced from all over the world," Ellicker says. "A stunning Moroccan or Tibetan silk piece makes such a statement—it's an easy game changer."
